CLAIMS 11-27 ARE PRESENTED FOR EXAMINATION

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 11-27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Beiersdorf AG (WO/96/18352, hereinafter referred to as Beiersdorf).

An official translation of the cited patent will be forwarded to the applicants as soon as it is completed.

Art Unit: 1617

Applicants' claims are drawn to the prevention or alleviation of sunburn by topically applying to skin a formulation comprising ascorbic acid and/or at least one ascorbyl compound; and at least one flavone derivative and/or flavonone derivative.

Beiersdorf teach at page 1, first paragraph that its invention relates to cosmetic or dermatological compositions for the treatment and/or prophylaxis of. . .and protecting cells which participate in the immune response of the skin. At page 4 its composition is taught to aid the immune system which is already damaged.

The major teaching of this reference is drawn to the use of flaonoids and at pages 9 and 10 the flavonoid alpha glucosylrutin is taught (applicants' claim 13) used as a protective agent against UV but also teaches that the formulation at page 18 can be used a sunscreen. The examiner has given applicants claims their broadest interpretation and since the term "preventing" is used in the claims a teaching of a sunscreen is within this terminology.

The amounts of flavanones that can be utilized as set forth in claims 14-16 are within the teachings of Beiersdorf at page 15, second full paragraph. The complexes taught and claimed by applicants at claims 23-27 are taught by Beiersdorf at page14, teaches EDTA (ethylenediaminetetraacetic acid). The reference further teaches at page 14 that ascorbyl palmitate, Mg ascorbyl phosphate and ascorbyl acetate are useful in the formulation. Therefore, the combination of claims 11-17 of ascorbyl and flavanoid to prevent and/or alleviate sunburn are obviated. The amounts of ascorbyl compounds (claims 18-20) to be present in the solution are taught at page 18, penultimate paragraph.

Art Unit: 1617

The elements of applicants' claims for a method of using a composition of flavanoids and ascorbyl derivatives, together with the additives for a sunscreen composition to prevent or alleviate sunburn are taught by Beiersdorf.

The test of obviousness is "whether the teachings of the prior art, taken as a whole, would have made obvious the claimed invention." In re Gorman, 933 F.2d 982, 18 USPQ 2d 1885, (Fed. Cir. 1991). In view of the above rejection it is deemed that the evidence presented has established a prima facie case of obviousness. is presented.

None of the claims are allowed.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

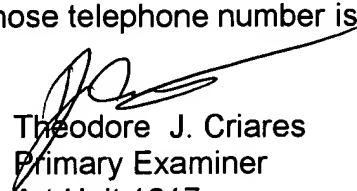

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
